Optical Society of Korea Industrial Affiliates Program Guide

Industrial Affiliates Program

INVITATION

INVITATION

Optical Society of Korea Industrial Affiliates Program

Information sharing in the field of optics and optical technology

The Optical Society of Korea, which is a representative academic organization in the field of optics and optical engineering in South Korea and plays a role as a driving force in the optical technology and optical industry of South Korea, has established the Industrial Affiliates Program to celebrate the 30th anniversary of its foundation. We invite industrial companies as members of the Optical Society of Korea's Industrial Affiliates Program.

- Provides opportunities for member companies to participate in workshops and conferences hosted by the Optical Society of Korea for the purpose of sharing information on the latest research trends in the field of optics.
- Provides Korean and English journals and public relations magazines of the Optical Society of Korea.
- Provides opportunities to request experts or topics desired by member companies when open lectures by invited renowned domestic and foreign scientists or experts of the Optical Society of Korea are held.
※ However, the related scope and costs will be discussed separately

Provision of promotional opportunities for member companies

- Provides opportunities to promote member companies using the companies' company names and logos at internal and external events hosted by the Optical Society of Korea.
- Provides opportunities to exhibit member companies' products at internal and external events hosted by the Optical Society of Korea.

Provision of information (DB) on student members for master's and doctoral programs in the field of optics

- Provides opportunities for member companies to browse the DB of student members who wish to find employment among members of the Optical Society of Korea.
- Provides opportunities to view information on student members of the Optical Society of Korea (with consent to disclosure of personal information) in certain fields of research designated by the member companies.

Expansion of opportunities to employ excellent talents in the field of optics

- The Optical Society of Korea provides places for meetings between member companies and job seekers for talent recruitment during winter and summer academic conferences for a certain period of time.
※ The cost for securing the place and time will be negotiated separately

Provision of experts or information related to resolving industry difficulties through the industrial affiliates program

- The Optical Society of Korea provides appropriate Optical Society of Korea (expert) members or information when a member company requests a technical solution.
- Provides information on the latest research/technology development trends in the field of optics
