

Dr. Wei research interests include optical detection of cancer and disease treatment by light. He received his BS in physics from University of Science and Technology of China. he received his PhD from Department of Physiology and Biophysics, Univ. of California, Irvine, USA. Dr. Wei completed his post-doc training at Children's Hospital, Harvard Medical School, Boston. From 2006-2010, he was a professor in Fudan University, China. From 2011-2018, he was a professor and chair in Department of Biomedical Instrumentation, School of Biomedical Engineering, Shanghai Jiao Tong University, China. Currently, he is a professor in Department of Biomedical Engineering, Peking University, China. Dr. Wei is an SPIE Fellow (Society of International Optical Engineering). He has published more than 80 peer-reviewed papers, including in Nature and PNAS.
